

*"I come from Indonesia. I chose to study a [Master in Management](#) at the VUB because I knew that ultimately, I'd need a business and management background besides my IT one to enter the Belgian job market.*

*The courses were great. I took something valuable from every module. I really enjoyed my Informatics for Management and Financial and Managerial Accounting courses. I'm happy to say that I'm already reaping the benefits of these courses. Besides that I made lots of friends from different countries and found the study atmosphere to be great.*

*I now work as a Business and Data Analyst for a Brussels-based technology company called Voxbone.*

*The courses at the VUB were absolutely instrumental in my being prepared for this job, given that it is mostly related to financial and business processes within the company in combination with the company's technology."*

Agung Darmawan, VUB Alumnus 2018
